

Six Steps to Success Programme for Nursing Homes

Course Duration This is a set programme of workshops and facilitations delivered over a period of 9-12 months, dates and times are negotiated with the Education Facilitator to suit the Nursing Home's requirements.

Course Cost Portsmouth City Council commission this work and therefore if you commit to the programme after a consultation with the Education Facilitator and you both agree to take it forward within your home, it is free at the point of delivery.

Target Audience Nursing and care homes in the Portsmouth area.

Course Information

- End of Life Care champions within the Nursing Home will be supported by the Education Facilitator to develop their knowledge, skills and confidence. They are then encouraged to empower other staff members in the care home to deliver high quality End of Life Care that encompasses the philosophy of Palliative Care. This programme, with the Education Facilitator, will provide evidence that change is happening.
- The programme consists of nine half day workshops. Additional support and advice is provided, including an introduction workshop, one for each of the six steps of the national end of life care pathway, a dementia workshop and a concluding workshop. Each session will embrace individualised patient care and communication as key elements.
- There is no charge to this programme. All that is asked is that the Home is committed and engaged with this process by supporting at least 2-3 staff members to attend the full programme. One must be a senior member of staff who can support, embed and sustain organisational change within the Home as required. This will be demonstrated in a completed portfolio of evidence.

Course Benefits

The Six Steps to Success programme has been developed to enhance End of Life Care through facilitating organisational change, and supporting staff to develop their roles around End of Life Care.
