

Syringe Driver Training

Course Duration Two hours

Course Cost £25 per person to include:
All course materials and refreshments

Target Audience Registered nursing staff who use a McKinley T34 syringe driver

Course Aims This 2 hour training session updates your existing knowledge to safely practice and explore the reasons for setting up and managing a patient requiring a syringe driver.

Course Information

This course will cover elements such as:

- accountability, advantages and disadvantages
- common drugs used and conversions
- includes a practical session in setting up the syringe driver
- A McKinley T34 syringe driver will be used during this training session and we will provide a certificate of attendance only

Please note this session will not check or sign off competencies of setting up a Syringe Driver or administering drugs; a policy will need to be in place in your own workplace to ensure competencies are checked within the team.

Course Benefits

Many have found this course helpful to maintain confidence in the use of this syringe driver and enjoyed the opportunity to consider drug use and review drug conversions. .
